

A crisp, clean solution for vertical exterior and interior walls, soffits and ceilings.

# Prestige Series® & Flush Panel

CONCEALED FASTENER PANEL

Norwood Junior High School | Sacramento, CA

**Prestige Series® & Flush Panel** are crisp, distinctive solutions for vertical exterior and interior walls, fascias, and equipment screen applications. They can also be used as a soffit or ceiling panel. The panel's concealed fastener system provides a clean, distinctive look in any application.

- Architectural wall and soffit panel.
  - Available in a variety of surface options; flat, pencil ribs, stucco embossed, etc.
  - Gauges: 24ga and 22ga standard. Prestige Series is also available in 18ga and 20ga.
  - Available perforated for acoustically sensitive applications or where ventilation is required.
  - Compatible trim and accessories are readily available.
  - Manufactured in Fontana, CA, Tacoma, WA and \*Dallas, TX.
- \*Flush Panel produced in Dallas only.

### Prestige Series specific features:

- The Prestige Series offers a design-flexible modular design with the panel option of a full 12" wide panel, or with a 1", 2", or 6" panel reveal.
- Sealant is provided as standard to create superior air and water infiltration resistance.
- Designed for use both horizontally and vertically.

Please refer to **Product Index and Applications Guide** on page 3 for more information. Contact AEP Span representative for details about specific product offering.
